Joliet in Photographs

GIVING A REPORT OF POSSESSION AND PRESENT CONDITIONS

POPULATION a little over fifty thousand. -- Four trunk line railway systems. -- Two coal and belt lines of railway, bringing in over thirty trunk lines. -- In the Chicago district, suburban fares. -- Freight rates the same without Chicago congestion. -- An Interurban Five Spoke electric system. -- The Illinois and Michigan canal. -- The Lakes to Gulf deep water way. -- The Wilmington coal fields in the suburbs. -- Joliet, in power, water or fuel; in transportation, water, steam or electric, has been made the center of the earth.

¶ It's many and large industries. -- A pay roll of \$9,000 daily. -- Four national banks, resources \$5,750,000.00, make it a splendid town for business.

¶ A Township High School sending its graduates through the best colleges in two years. -- Twenty-nine grade and denominational schools give every child a seat; attendance compulsory. -- A public library costing \$196,000.00 and two club libraries give every inhabitant the books. -- Six hundred and fifteen acres in free parks. -- A Commercial club for public business. -- A Social Club for fun. -- A Working Men's Club for rest. -- A Young Men's Club for exercise. -- A Woman's Business Club for lunches. -- A Country Club for golf. -- A wide awake and public spirited people with good health and miles of streets paved makes Joliet a good town to live in.

¶ The Trunk Lines are elevating their tracks -- one-half the retaining walls completed. -- One hundred and twenty-five miles of the Five-spoke Interurban in full operation. When completed giving two fast lines to Chicago, one to St. Louis via Peoria, (another via Bloomington and Springfield), another to Princeton. One spoke connects with the Wisconsin System, and another with the Indiana. -- The deep water way built from Lake Michigan to Joliet, on its way to the Mississippi, with 52,000 electric horse power developed will give Joliet a total of 89,000 electric h. p. makes Joliet a good town this year, A. D. 1909.

¶ In freight and passengers, dollars and cents, Joliet is the best town on The Great Rock Island System between Chicago and Kansas City; on the Alton System, excepting Chicago, St. Louis and Kansas City; on the Santa Fe between Chicago and Kansas City; on the Michigan Central, leaving out Chicago, Detroit and Buffalo; and the best on the two belt and two Interurban systems. Thus Joliet is a good business city every year. A good town to live in any year, and all the years.

HARPER PHOTO

The News Building

The All-car Corner, Ottawa and Van Buren Streets

THE Daily News started April 9, 1877; purchased by the present management Sept. 30th the same year; incorporated January 19, 1885. Independent in politics and an exponent of all good things always. Employees 147. Expenditures average \$60,000.00 annually. James H. Ferriss, president; H. E. Baldwin, secretary and treasurer; George F. Seely, business manager.

JOLIET IN PHOTOGRAPHS

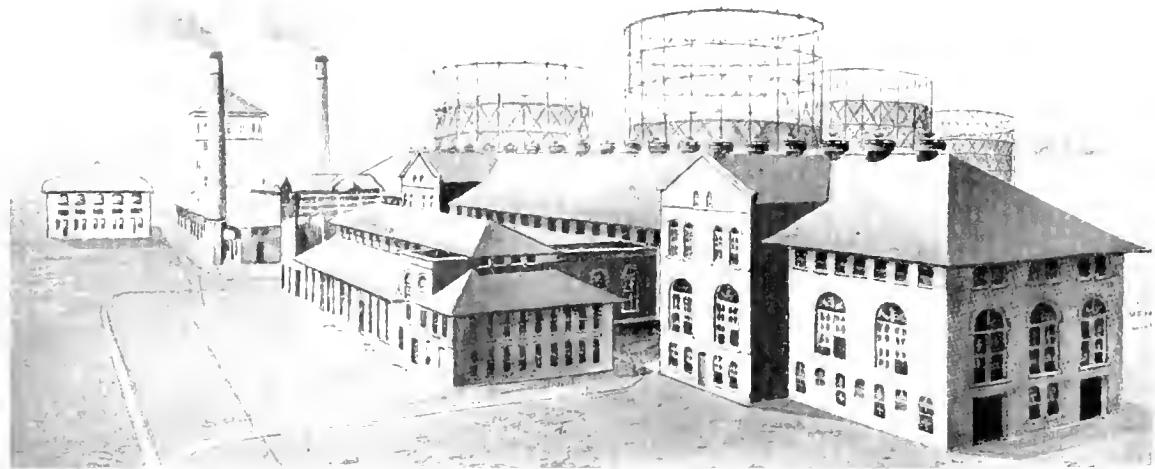

HARPER PHOTO

LIVING ROOM

The Commercial Club

THESE quarters are nearly outgrown. Especially is this noticeable at the luncheon hour. The club has a membership above 400 and will probably have 500 before the end of the present year. Their rooms are the headquarters for the business people and the business activities of this section. ¶ C. W. Jordan, Pres.; W. O. Hodgdon, Industrial Agent. ¶ The Union Club, of equal importance, is purely a social club, with rooms at the Masonic Temple, and a country club with 80 acres of ground upon the Manhattan line. ¶ No liquor is sold at these clubs. Liquor is not a favorite here in business or society.

ARCHITECT'S DRAWING

PLANT OF WESTERN UNITED GAS COMPANY

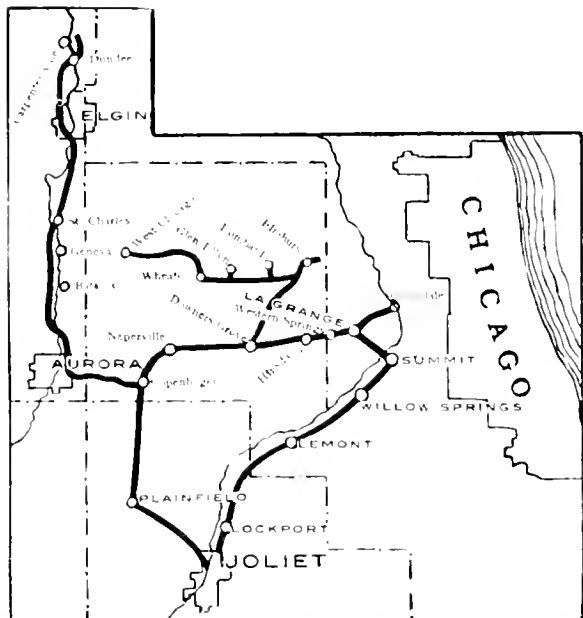

The Western United Gas Company

OLD plants have been purchased and rebuilt and new ones erected in more than thirty cities and villages in this part of the state by the Western United Gas Company.

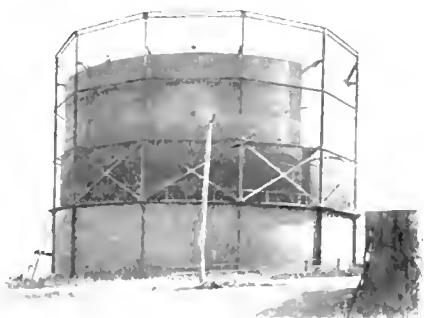

These plants are connected by 118 miles of pipe line, and the system is to be supplemented with a modern central plant here this season at the Dellwood dam, present terminal of deep water navigation. ¶ Here the coal of Pennsylvania and West Virginia will be unloaded by gravity from the boats upon an elevated railway switch, and again delivered in turn by gravity to the hoppers of the coal bins. ¶ There will be two units of manufacture, each with a capacity of 3,000,000 cubic feet daily. Also a 500 h.p. electric plant, installed in duplicate. Traveling cranes will handle all outgoing or incoming material, and all machinery and heavy work will be performed by power.

J O L I E T I N P H O T O G R A P H S

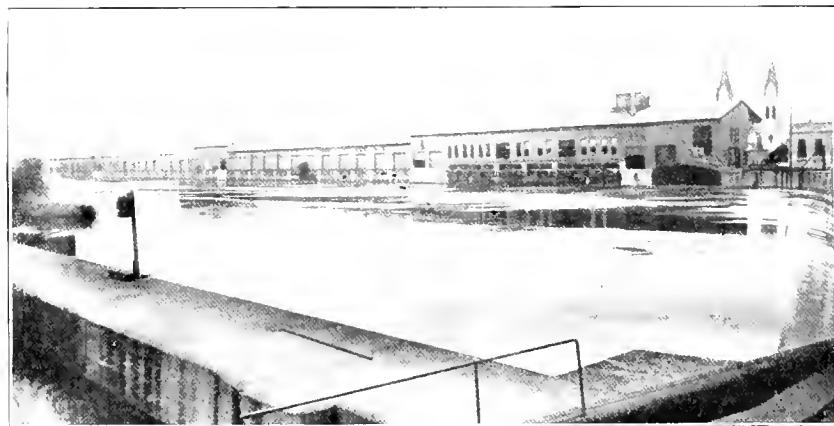

¶ Joliet is a cheap gas town, with prices adjusted by arbitration every five years. Duplicate lines of mains supply the loop in which Plainfield, Aurora, Naperville, Downers Grove, Hinsdale, La Grange, Summit, Willow Springs, Lemont and Lockport are situated. The farmers also have the advantages of cheap gas, and clamor continually for an extension of the mains. ¶ The company has laid 520 miles of mains and has over 600 employees; 28,031 service connections, and during the summer months of the past year had out 28,221 meters. Cooking by gas has become the fashion. ¶ New offices are now being erected upon Ottawa street, half a block north of the News building. President -- Ira Copley, Aurora; District Manager -- H. J. Mitchell, Joliet

JOLIET OFFICE
ECONOMY LIGHT & POWER CO
(A Night View.)

Economy Light

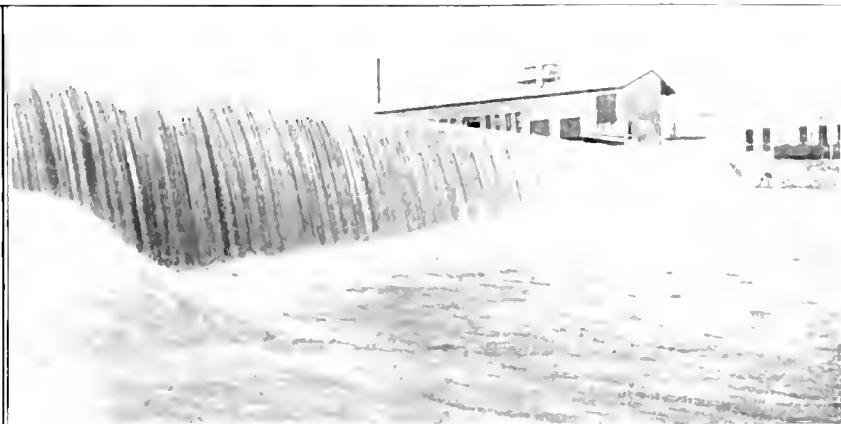

THE water power at Jackson street, utilized by the Economy Light & Power Company, is derived from the Desplaines river.

In its power house of an eighth of a mile in length, a total of 10,000 h. p. is developed. From this plant the electric railways running to Chicago, and the towns of Lemont, New Lenox, Frankfort, Newfield, New Lenox and Rockdale are lighted. ¶ Near Jackson street, the Desplaines river is dammed, the water being diverted through a canal 1,200 feet long, capable of producing 2,500 h. p. ¶ The Economy Light & Power Company has a system of 125 miles of lines from Joliet to its mouth, embraced in which are two water power plants, one at the mouth of the Desplaines river capable of producing 25,000 h. p., and another at the mouth of the Kankakee river capable of producing 10,000 h. p.

J O L I E T I N P H O T O G R A P H S

JOLIET has four national banks and one private bank, conducted by home business men and bankers, possessing the full confidence of the people. One has 80 stockholders and two others are not far behind in this respect. They have never known trouble. In the last New York flurry cashier's checks, without further security than the cashier's signature, were cheerfully accepted in both Joliet and Chicago. Business was not interrupted here by that disturbance. In truth the disturbance did not hit Joliet. All of the bank construction illustrated here was built in the past two years. They seem good enough for any city.

HARPER PHOTO

— Will County National Bank —

Ottawa and Jefferson Streets

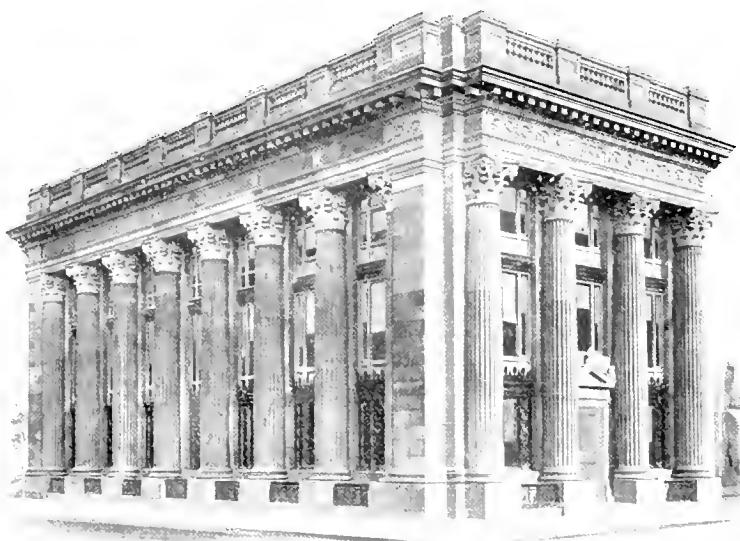

THE Will County is the second oldest national bank in this city; chartered 1871; capital and surplus, \$360,000.00. The building was completely remodeled in 1908, and at Ottawa and Jefferson streets has one of the best corners in the city. Present resources \$1,823,350.83. Chas. H. Talcott, Pres.; J. W. Folk, Vice-Pres.; Henry J. Weber, Cashier.

Woodruff Safe Deposit Building

Leased by The First National Bank

IN classical architecture, this is the most perfect example in our city. Both the interior and outer decorations are in excellent taste, applied with a liberal hand, and in our day a credit to any city. The building was erected the past season for the use of The First National. This is our oldest bank---established in 1857; chartered as a national bank in 1864 (No. 512). Present resources \$1,483,965.44. George Woodruff, president; A. H. Wagner, cashier; John K. Bush, Assistant Cashier.

HARPER PHOTO

HARPER PHOTO

The Citizens National Bank

Barber Building, Chicago Street

THE Citizens is the youngest of the four national banks of this city. It was organized in 1902, with a capital of \$100,000.00. A savings department was added later to meet the convenience of small depositors. Total resources to date \$940,000.00. Robert Pilcher, President; Fred Bennett, Vice-President; Geo. Erb, Cashier; F. W. Woodruff, Assistant Cashier.

FOUNDRY
100x210
FEET

— Jas. G. Heggie Boiler Works —

ONE of our large factories, starting here from small beginnings, seventeen years ago. One of these buildings is 85x250 feet; the other, 60x250 and 60 feet in height, was built the past season. Twenty-ton cranes reach any portion of the buildings. Equipment the latest and best in boiler making. Heavy boiler plate construction is shipped from here to Mexico, Canada and all parts of the Union. The Roosevelt dam in Arizona is a present day customer.

HARPER PHOTO

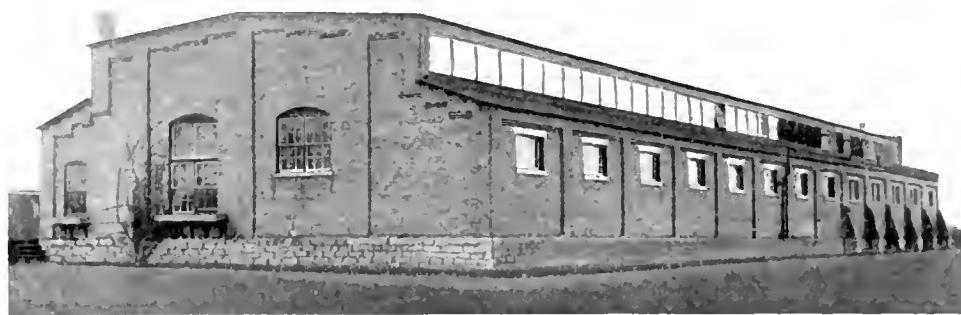

¶ Our cover design is a photograph of the bust of Louis Joliet placed above the main entrance to the Joliet High School. It is the work of Will La Favor, a graduate of the Joliet public schools, and it is a pleasure to announce that this is the best portrait of the great explorer.

HARPER PHOTO

Joliet Railroad Supply Co.

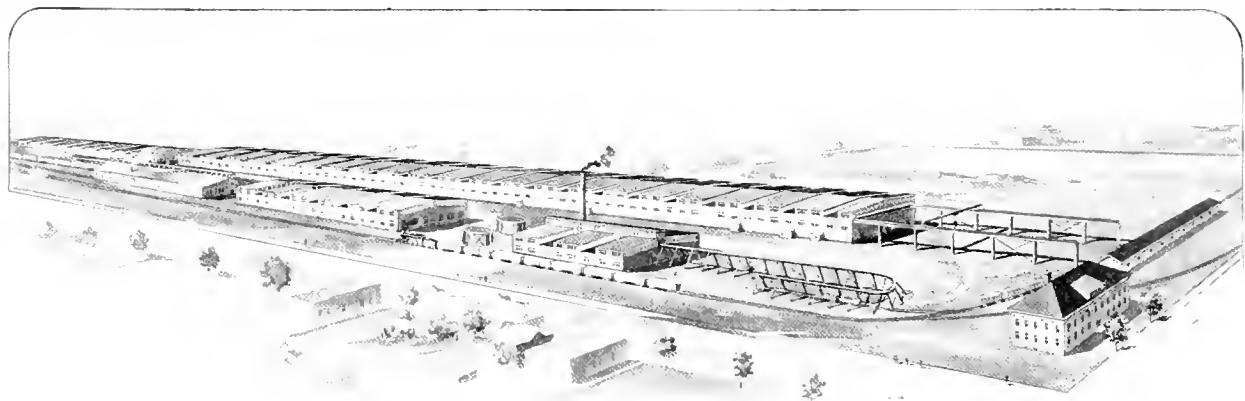

FORMERLY Perry Side Bearing Co., manufacturing brake beams, side bearings and other railroad specialties. Building 160x60, two stories; machinery of the latest and best patterns. Col. Fred Bennett, Pres.; E. A. Laughlin, Manager.

Franklin Steel Company

THE factory located here in 1903, now neatly decorated with vines and shrubbery, and is considered one of our neatest factories--manufacture toe calks in 200 sizes and shapes, of open hearth steel for the territory west of the Ohio. The process of manufacture is principally machine work and twenty-five men are employed. Eastern factory, Cambridge, Mass. F. W. Pitcher, President; W. F. Pitcher, Treasurer and Manager.

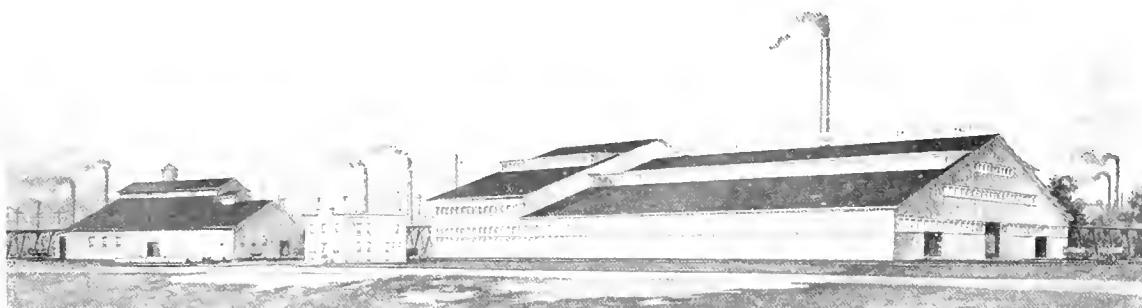

HARPER PHOTO

ARCHITECT'S DRAWING

Joliet Steel Car Manufacturing Co.

ORGANIZED in 1908 for the manufacture of a special steel car and general line of steel car building and repairing; works located upon the Joliet belt line. The first of six units, herewith illustrated, one building 80x800, the other 80x400, costing, completed, \$381,435.00. Construction will be started the present month. Capacity 3,000 cars per year. Robert B. Campbell, President; Victor R. Browning, Cleveland, Vice President.

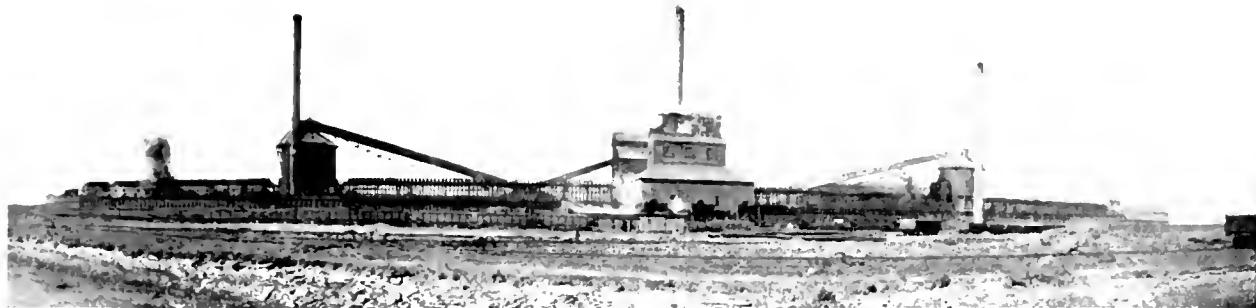

ARCHITECT'S DRAWING

The Joliet Bridge and Iron Co.

ORGANIZED 1896, new building now under construction, by their own workmen. Over 4,000 contracts in bridge work and steel buildings have been finished by this firm. Some of their customers were:

The American Can Co., Elgin National Watch Co., Deere-Mansur Co., Moline; Challenge Wind Mill Co., Batavia; Commonwealth Steel Co., St. Louis; Board of Education, Chicago; Memphis Street Railway Co., Memphis; Roaring Fork Plaster Co., Colo.; Chicago and Joliet Electric R. R. Co.; Sanitary District of Chicago; Helena Postoffice, Helena, Mont.; Union Labor Temple, Los Angeles, Cal.; Peerless Portland Cement Co., Union City, Mich.; Auditorium Building, Saginaw, Mich.

The new building at the right is 160x320 feet, and their traveling cranes will reach every space of the flooring. To this there will be a wing 80x120 feet. The capacity of the plant will be quadrupled by this new structure. R. C. Morrison, President and Treasurer.

PHOTO

COKE OVENS

— Illinois Steel Company —

THE Illinois Steel Company erected these four batteries of by-product coke ovens, consisting of 280 ovens at their plant here in 1908. It is the only plant of its character in America, and has been a great success. The coal and tar and ammonia are sold for shipment. The coke is used in the blast furnaces at the plant, and the surplus gas, 17,500,000 cubic feet daily, is consumed for power at the rod mills.

ROCKDALE PLANT

American Steel & Wire Company

THE invention of barb wire fencing aided greatly in the development of the west, and a number of western cities entered into the movement with energy. At one time Joliet had over twenty manufacturing concerns making as many kinds of barb wire. These were gathered into the great American Steel and Wire Company, now manufacturing nails and about all of the wire products - fencing and galvanized wire continuing as the leading lines. In Joliet there are two plants, and these in 1907 employed 1,503 men with a pay roll of \$1,075,702. Their product was 196,094 tons in that year. The Rockdale plant was formerly known as the Enterprise Mill. Fred Ingraham, Superintendent.

SHOPS OF THE ELGIN, JOLIET & EASTERN RAILWAY, MAPLE STREET

Elgin, Joliet & Eastern

(Chicago Outer Belt)

COMMENCING at the left, blacksmith building; machine shop; woodworking shop right of round house; 200,000 gallon tank for fire protection; new storehouse, in foreground at the right. Steel car repair shop, sugar warehouse, icing plant and other buildings not shown.

The freight handled by the belt roads through Joliet is enormous. In this respect, the Michigan Central line into the city is something of that nature. The Chicago-Milwaukee, Gary, completed from Rockford to Momence, and building to Milwaukee and Gary, is a belt road in fact. The Elgin, Joliet and Eastern, built from Waukegan to the coal fields and Joliet, and the Chicago, Lake Shore and Eastern, from Joliet to Gary, operated much as one, makes another complete belt for Joliet, and also for Chicago. Same freight rates as Chicago. Robt. B. Campbell, Joliet, General Manager.

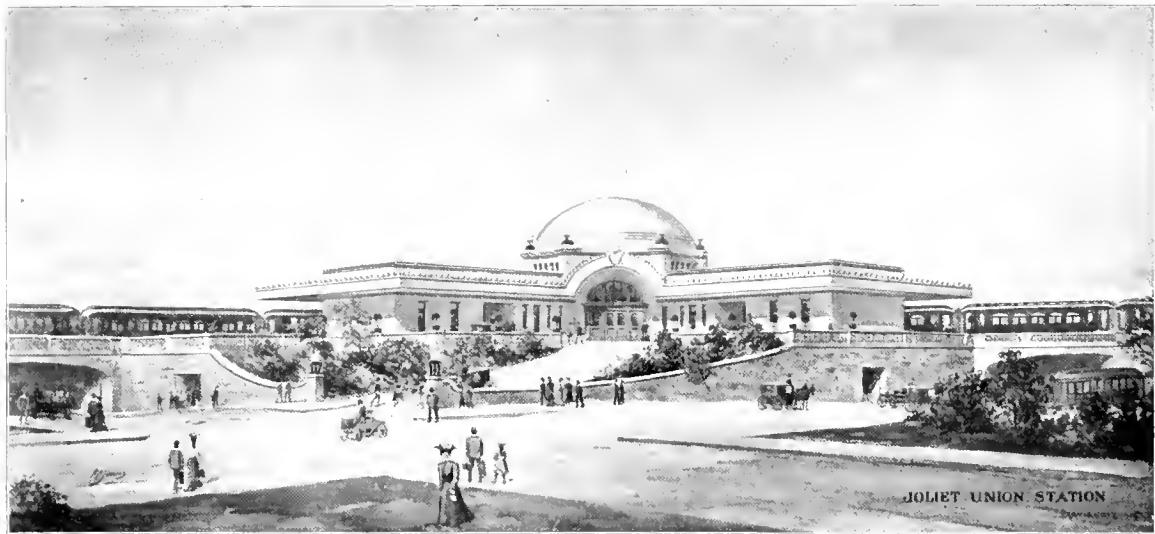

CHICAGO, LAKE SHORE AND EASTERN RAILROAD YARDS AT THE GARY TERMINUS

Chicago, Lake Shore & Eastern

THIS road has 165 miles of trackage, and at the Gary terminus storage room for 15,000 cars. Over the road for the year ending June 30, 1907, a normal year, 2,849,287 tons of coal, stone, ore and miscellaneous freight were received, and 1,420,709 tons, or 40,777 cars, forwarded. The number of loaded cars passing through Joliet over this road for the same period was 18,199, or 629,685 tons. The road owns 6,532 freight cars, 41 freight locomotives, 84 switch locomotives. The average number of men employed is 532, with an annual pay-roll of \$365,000.00. Robt. B. Campbell, General Manager, Joliet.

ARCHITECT'S DRAWING

UNION STATION

Chicago & Alton Railroad Company

"THE Only Way," the familiar trademark of this leading road, connects Joliet with the coal fields of Central Illinois, which reach the famous Braidwood-Wilmington mines on the Alton in this County but 15 miles distant, while the Coal City branch commencing at Joliet taps the coal district in Grundy County, insuring cheap fuel and plenty of it for Joliet. Coal famines are not known here. ¶ The block south of the present site of the Alton passenger station has been chosen for the new \$90,000.00 union depot, illustrated upon this page, included in the plans for track elevation. The tracks for the trunk lines are being raised by mutual agreement between the city, county and railway companies. The Alton joins with the Santa Fe in the north and south line through the city. ¶ Commencing at Joliet, with Joliet promoters, builders and managers, and much Joliet good will this is now the great Chicago, St. Louis and Kansas City road, with Springfield, Bloomington and Peoria in between.

HARPER PHOTO

TRACK ELEVATION, C.R.I. & P.R.R.

Chicago, Rock Island & Pacific Railway

A NOTHER example of early Joliet enterprise. This great system made its commencement with Joliet capital here in our court house yard, and the compass was pointed west. This year for better conditions at the court house and in the city, at a cost of \$150,000 for real estate, this corporation joins with the Michigan Central in a new right of way east and west through the city, the latter road passing over the Desplaines river in readiness for western extensions. The total cost of elevation of the trunk lines here will be about \$2,125,000. ¶ The Rock Island, within a few years, has become one of the greatest railway systems, giving Joliet prompt service to the south, Arkansas, Oklahoma and Texas, west to Iowa, Kansas, Mexico and California, and northwest to Nebraska, Minnesota and the Dakotas. With this new right of way, the probabilities are strong that the company will double its trackage, and thus become a four track line through to the Mississippi river. The road has a large suburban traffic, its special trains running between Joliet and Chicago, a distance of forty miles, in fifty minutes. ¶ The photograph was taken on Washington, near Richards street, looking west, the court house in the background. One half the retaining walls on the four trunk lines were completed the past season.

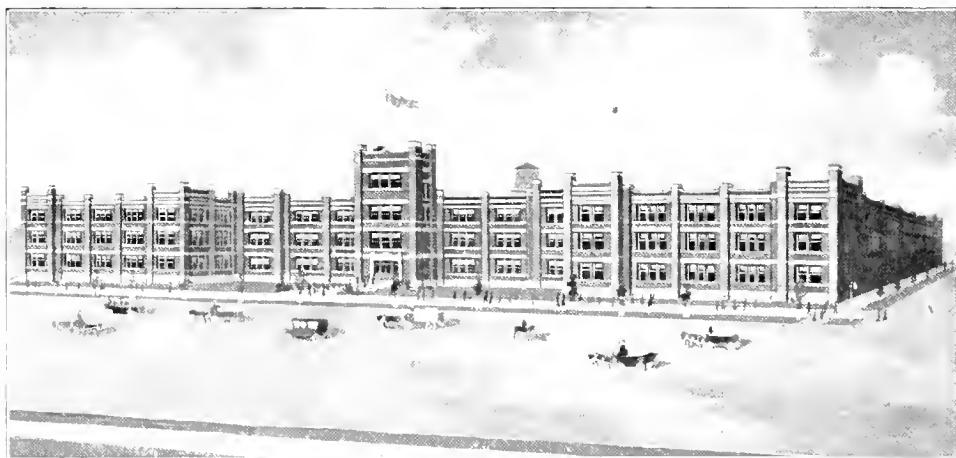

CHANNAHON
BRIDGE
ON THE
DU PAGE RIVER

L. S. & E. R. R. Companies. The hall seats 800 people. The library revised and brought up to date, contains 7000 volumes. There are nine billiard tables, a bowling alley, swimming pool and baths (22,000 baths were taken in 1908). Membership 1,200. The entertainment and lecture courses tax the capacity of the building, and many of the best discussions, banquets and lectures of Joliet are given here. F. M. Savage, Superintendent; Miss Maud Parsons, Librarian.

— Star Wall Paper Mills —

A NEW industry, entering the field in a small way, that has become one of large dimensions. The new factory, built in 1908, on the Joliet Belt Railroad, has 3 floors 300x66. Wall paper is the sole product. Frank J. Kelly, President; S. R. Knott, Manager.

HARPER PHOTOS

— Adam's Steel and Wire Works —

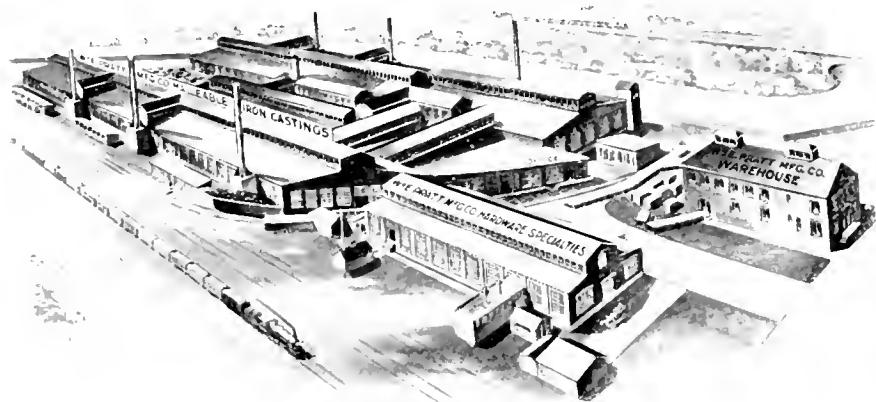

THE Adam's Company manufactures prison and jail fixtures largely. They have recently built new cells for the penitentiaries at Michigan City, Ind., Waupun, Wis., Bismarck, N. D., and Elmira, N. Y. They also build ornamental fencing and that class of steel and wire specialties. William J. Adam, Pres.

HARPER PHOTO

Phoenix Horseshoe Company

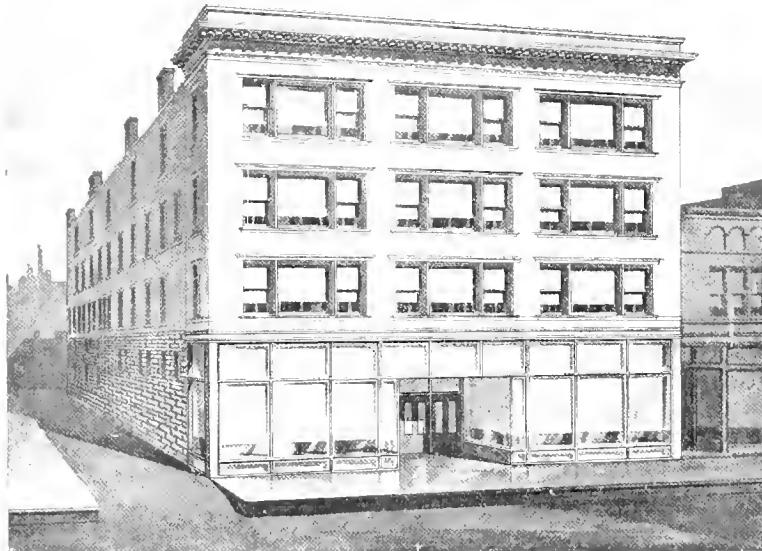

THE Phoenix Horseshoe Company, of Poughkeepsie and Joliet, is the largest manufacturer of horseshoes in the world. They manufacture all classes of horseshoes, having over 225 patterns. Four hundred men are employed in Joliet. J. W. Kiser, president; Thos. F. Hotchkiss, general manager.

ENGRAVING

Wm. E. Pratt Manufacturing Company

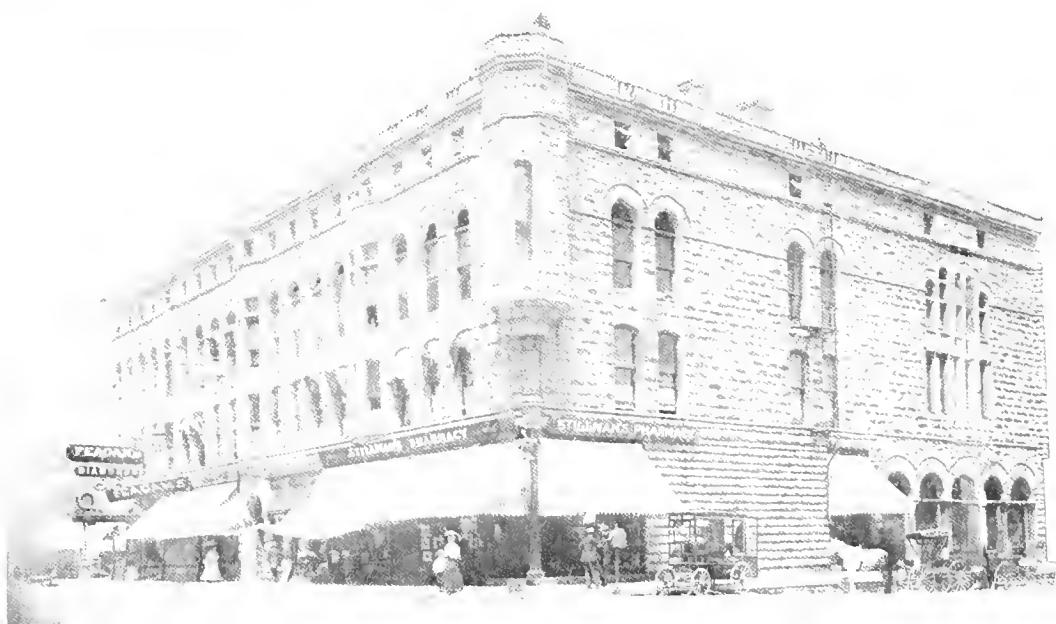

THE Wm. E. Pratt Company, having a melting capacity of seventy-five tons daily, manufactures the principal lines of malleable iron hardware, japanning, coppering, tinning and galvanizing the same. Works at Manning avenue on Hickory creek. Six hundred men are employed. Wm. E. Pratt, president.

ARCHITECT'S DRAWING

Barrett Hardware Co. —

BUSINESS houses here are well to the front. The Barrett Hardware Company, established about 1850, has the reputation of being the most complete in the state. Following a fire, they are rebuilding on Ottawa street, second door south of the News Building, and will occupy the entire structure, five floors 66x150 feet. J. O. Barrett, President.

SALESROOM FEAGANS' JEWELRY HOUSE

The Auditorium

Chicago and Clinton Streets

THE Feagans wholesale and retail Jewelry House, Lontie G. Feagans, Manager, and the Stillman Pharmacy, H. A. Stillman, Manager, also old and settled houses here, occupy the Auditorium. Their business, as to enterprise and completeness, is conducted along the same lines with the preceding, and they have equally as wide a reputation over the state. The building is owned and the second story is occupied by the St. John's Universalist Church society, Rev. Harry Westbrook Reed, Pastor.

Joliet Homes

MODERN homes here date from the early eighties. Since then they have grown rapidly under the guidance of excellent architects, and there are now many beautiful residence streets in this city, with dwellings costing from five to fifty thousand.

J. D. Thompson Carnation Company

JOLIET is one of the great carnation cities. There are three large firms here. Two of these grow carnations principally, and roses and chrysanthemums incidentally for the general trade, and are known to be among the foremost in the nation for volume of business and their prize winners. The Madam Lawson, Enchantress and other famous bloomers were disseminated from Joliet. The Thompson Company has nine houses, with 90,000 feet of glass. Chas. M. Fish, president and general manager.

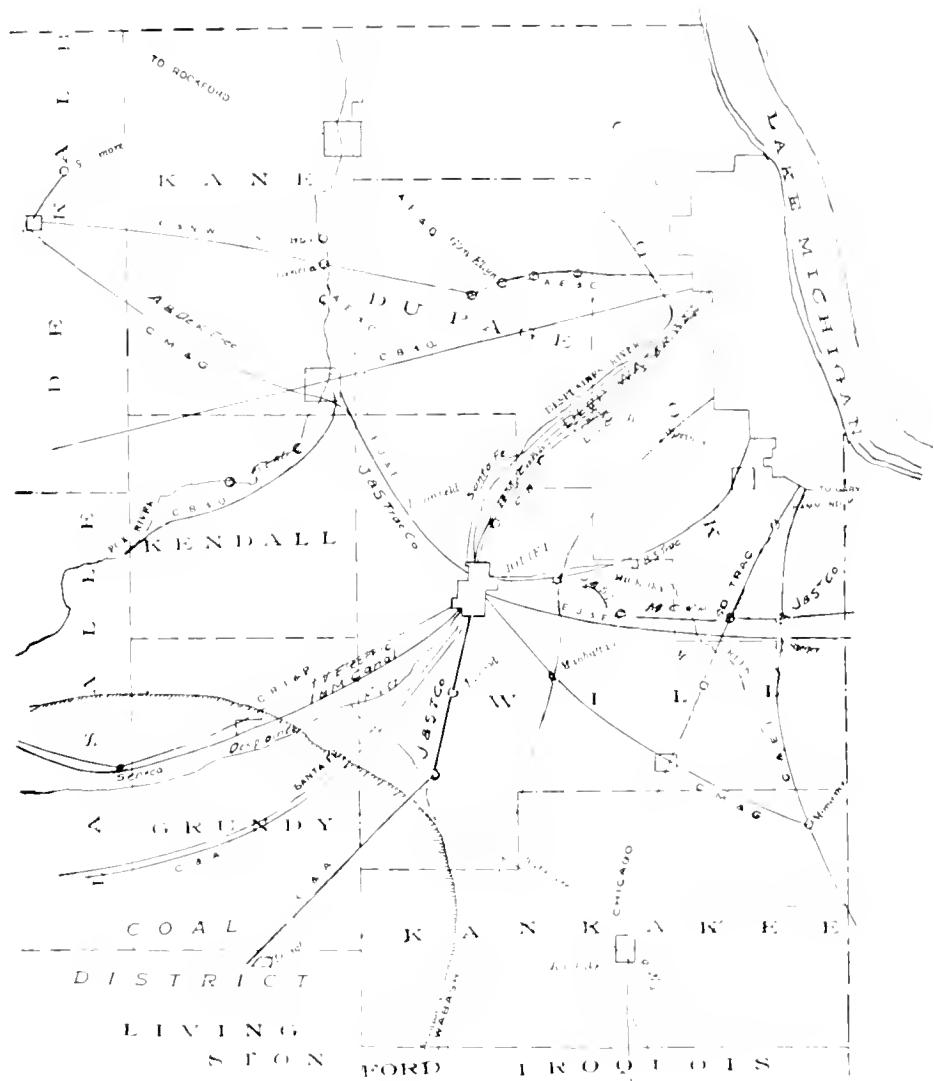

HIGH SCHOOL PHOTO

Higinbotham Park

A TRACT of native timber, 400 acres, owned by Harlow N. Higinbotham and maintained as a semi-public botanical park to which collections of trees and shrubbery have been added in their scientific order. Negotiations are now under way to purchase this tract by the city for an arboretum and public park.

The Joliet Gateway

THIS birthday souvenir has been compiled in the rush hours of newspaper duties, and as the rule goes with busy people we are also sorry the work is not better -- sorry that not all of the beautiful views, great factories and splendid buildings of Joliet are included. These given are but samples, and -- as to the homes -- not the best, and we now find that our hotels, two splendid hospitals with a capacity for 150 patients, two orphan asylums, and a penitentiary with capacity for 1,700 patients, have been overlooked.

Joliet township has a little over 50,000 in population. To the north it is built up solidly against Lockport, a village of 5,000, and then it is nearly solidly built up on to Chicago, and then on and on to Milwaukee. There are some who dream of a wonderful population during their lifetime upon this old Indian trail bordering the rivers of the Illinois and Desplaines and the west coast of the lake.

The pictures give a hint of present day conditions. Joliet is a gateway, or freight and passenger schedule point between the east and west, known for convenience in inter-state commerce terms as the "Joliet Gateway". Shippers have all the trunk lines entering Chicago brought to their door by the Joliet or outer Chicago belt lines. The Chicago freight rates, the yard facilities and transfer conveniences here together with water transportation make this probably the best shipping point on the continent. It is near the consumer and near the supply.

People proud of their city are ever glad to recite its glories and to entertain their guests. It is so here. Further information may be had by addressing the Commercial Club, or the News. Both have officials elected for the purpose, and chosen for their accommodating natures. The 100,000 Club, the Citizens' Alliance, and two other daily papers also have officials of a similar character.

A Recent Report

AT the monthly banquet of the Commercial Club, Joliet, Illinois, held Wednesday evening, March 17, 1909, A. F. Banks, of Chicago, president of the E., J. & E. "Outer Belt" system, spoke in part as follows:

"It is a great pleasure to be with you this evening. It is a pleasure to be with men who are fully alive to the advantages of their own city and who are unselfish enough to want to share those advantages with others not so fortunately located, by extending to them through their business organization an invitation to bring their industries to Joliet and share in the advantages this city enjoys in having a first-class climate in which to live, good schools, none better, good homes, good labor, and last, but not least, good transportation facilities.

"Business throughout the United States for the past year has been very dull, many manufacturing plants having been closed; railroads have curtailed their improvements and their expenditures of money, but the dull times have been felt less in Joliet than any other city of its size in the United States, so far as I have been able to learn of the situation.

"The Illinois Steel Company has worked a larger percentage of its capacity during this dull period than at any other of its plants. It has gone right ahead with its improvements and has built during the past year its large by-product coke ovens and has made many other important improvements in its Joliet plant. The various other industries of Joliet have curtailed their output less than similar plants in many other cities.

"So far as our own road, the Elgin, Joliet & Eastern railway, is concerned, we have kept our shops on practically full time and with about our usual complement of workers employed.

J O L I E T I N P H O T O G R A P H S

"The outlook for business is better and I think we can all look forward to better business throughout the country during this and the following year, and as the business of the country improves Joliet will, without doubt, be able to obtain its share of the general prosperity."

* * *

"I do not know that there has ever been any serious complaint that the transportation interests that serve your city have not served you well and given to your city a fair adjustment of rates. The natural advantages of Joliet as a manufacturing city, in my opinion, are unexcelled in the West. The Rock Island Road was, I believe, the first road to give to Joliet rail transportation. It opened its lines between Joliet and Chicago for traffic in 1852. Today that system affords to the merchants and the manufacturers of Joliet for the distribution of their products about 15,000 miles of its own and controlled rail lines.

"Since the building of the Rock Island Road to Joliet, other roads have built their lines into your city, and today you have all of the vast territory of the New York Central Lines open to your merchants and manufacturers on the same basis of rates and facilities as are enjoyed by your sister city, Chicago. You have the Chicago & Alton Railway and its allied lines reaching to the Mississippi and Missouri Rivers; the Santa Fe, with its thousands of miles of tracks, reaching to the Pacific Ocean and spreading over the West, South and Southwestern states.

"Your last addition to your transportation facilities, the Chicago, Milwaukee & Gary Railway, brings Joliet into closer relation with Rockford, DeKalb, and other of the growing manufacturing cities of Illinois; and last, but I trust not the least in importance to your business interests of Joliet, is our own road, the Elgin, Joliet & Eastern, which affords to the Joliet shipper all of the facilities enjoyed by any one shipper located on any one road in Chicago. When I say all the transportation facilities, I mean that the E., J. & E. Ry., having joint tariff rates with all of the roads entering Chicago, gives to a shipper at Joliet the same rate as each of the railroads entering Chicago gives to a shipper located upon its own lines, so that, through the medium of the E., J. & E. as a Belt Line, Joliet is being served by every railroad entering the city of Chicago.

"Speaking of belt lines, Joliet has its own belt line. When the E., J. & E. built its tracks into Rockdale, it completed a belt line around the city of Joliet, with the exception of a bridge over the river at Rockdale. This Joliet belt line opens up a large territory suitable for manufacturing purposes, a territory included in your scheme for a greater Joliet, and I predict that the pull-together spirit that is so pronounced in the business men of Joliet will result in enlarging the present industries of Joliet, and the bringing to Joliet of new industries, until the belt line around Joliet will be lined with live manufacturing institutions, furnishing employment to thousands of working men.

"I have said that I believe Joliet is an ideal city for manufacturing purposes on account of its superior transportation facilities. It is also, in my opinion, ideal for manufacturing purposes on account of its superior school facilities. The people of Joliet may well feel proud of their beautiful school buildings and wonderful educational facilities.

"A manufacturing city that is a success must afford to the children of its workingmen good educational facilities. Every man who toils as a day laborer or as a working man is looking to the future of his children, and is anxious that they may have the advantages of an education that perchance were denied to him, and so I believe that the good schools help to make good workmen and to better the business atmosphere.

"Joliet, possessing these things, is truly an ideal manufacturing city."

Joliet Manufacturers

The figures indicate the number of people employed. Other large employers, except those engaged in the home retail trade, are included:
